

## **Review of risks:**

### **Known risks: (As outlined in the weekly meeting on 29/01/25)**

#### Team communication

Probability: Changed to high due to absence of some team members.

Mitigation: We are attempting to minimise this impact by continuing to keep in regular contact. We have held a communication review as seen above.

#### Missed deadlines

Probability: Changed to high due to complexity of some tasks and absence of some team members.

Mitigation: Continue regular communication and update the trello board regularly.

The following known risks do not need updating:

Deployment and hosting issues, delays caused by dependencies in code development, technical issues.
